MSCI index variants

Price Index measures the price performance of markets without including dividends. On any given day, the price return of an index captures the sum of its constituents' free float-weighted market capitalization returns.

Net Total Return (TR) Index reinvest dividends after the deduction of withholding taxes, using (for international indexes) a tax rate applicable to non-resident institutional investors who do not benefit from double taxation treaties.

ABOUT MSC INC.

MSCI is a leading provider of critical decision support tools and services for the global investment community.

With over 50 years of expertise in research, data and technology, we power better investment decisions by enabling clients to understand and analyze key drivers of risk and return and confidently build more effective portfolios. We create industry-leading research-enhanced solutions that clients use to gain insight into and improve transparency across the investment process. To learn more, please visit www.msci.com.
